MEMORANDUM FOR THE RECORD

SUBJECT: OC MAP Fiscal Requirements

OC MAP fiscal requirements which were submitted to OJCS covered only those requirements which would not be satisfied by the Agency-wide financial data base, thus these requirements are not satisfied in whole or in part by such data base. We understand that initially the Agency-wide financial data base will provide the financial information which we are now receiving (reports of trends, deviations, etc.). This information is now entered to the data base monthly and thus the report information is at times more than one month old before updated reports become available. It is understood that the "General Accounting System" program, a follow-on to FRS-1 will accommodate daily update and thus provide on-line much more current information; 3-5 days old depending on user submission promptly of posting information.
